## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Restriction/Election***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-33, drawn to a method for determining the severity of an arthritis condition in a mammal, said method comprising determining whether or not a sample from said a mammal contains an elevated level of a CD21L polypeptide, an elevated level of a lymphotoxin  $\beta$  polypeptide, or an elevated level of a chemoattractant polypeptide, and communicating information about the presence or absence of said markers to a professional, classified in class 435, subclass 7.1.

Group II. Claims 34 and 35, drawn to a kit and instructions to use, comprising at least two oligonucleotide primer pairs, classified in class 435, subclass 6.

These inventions I-II are each independent and distinct for the following reasons.

Inventions I-II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). For example, invention II, directed to a kit comprising oligonucleotide pairs, is distinct from invention I, drawn to a method of determining the levels of polypeptides. The oligonucleotide pairs of invention II cannot be used for determining levels of polypeptides in invention I. Therefore, these inventions cannot be practiced together, while they also require separate searches, and considerations. Thus, these inventions I and II are patentably distinct.

Having shown that these inventions are distinct for the reasons given above, they have acquired a separate status in the art shown by their different classification, and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has prima facie shown a

Art Unit: 1646

serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
